Hub News

On Monday, our Wye Community Hub provided a pallet of food and personal items to go to the floods at Taree/Wingham area. Some friends from the Paper Title, just next to us, came for assistance to help their family and others who have lost everything from the floods. They were very happy as we loaded the items into their car and ute. It's interesting how people living near us are now looking to us to support them. Over the years we've provided much support with the washing machines, food, etc and people are connecting through the work of the Hub. A big thank you to all involved.

HAPPY BIRTHDAY

Drago Brelih – June 4

3ABN 1-hour Interview

Last week **Dr Allan Lindsay** shared with us the lead up to the Great Disappointment of October 22, 1844. Today he continues the story of what happened on earth directly after that day and how God revealed what really took place, and where. Did you know there is a very important story in the Bible that perfectly mirrors the Great Disappointment? It is a fascinating story that Dr Lindsay unpacks for us. It builds faith as we see God's hand over events and the fulfillment of His prophecies—right on time—including the present judgment. Are YOU ready?

3ABN Australia's 1 hour interview program, 3ABN Now, can be viewed on 3ABN International every week on Sundays at 7:00pm, repeated Tues., 7:00pm and Wed., 9:00am. The guest this week is **Dr Allan Lindsay** (1844 & the Great Disappointment). Next Sunday is Clifford Goldstein. You can also watch www.3abnaustralia.org.au, 3abnplus.tv (scroll down to 3ABN Australia), or on the free phone App.

Evolution Is Wrong About The Grand Canyon

The Grand Canyon often evokes a narrative of ancient history spanning millions of years, but is there an alternative explanation that aligns with the Bible's historical account?

From sedimentary layers to fossil arrangements, what if the evidence pointed to a catastrophic worldwide flood instead of slow geological processes? Explore the connections between geological and biological evolution, questioning assumptions like radiometric dating and the implications of bent rock layers that seem to defy conventional explanations.

Scott Gillis invites us to reconsider widely accepted interpretations of Earth's history, proposing that the Grand Canyon is not a monument to time but a scar from God's judgment during Noah's flood. Unfold the evidence that he believes not only supports the Bible's truth but also challenges evolutionary timelines, pointing to a Creator who shaped, judged, and seeks to redeem the world.
