Bible Study—Growing in a Relationship With God

Lesson 8: Having Faith

Memory Text:

“Faith shows the reality of what we hope for; it is the evidence of things we cannot see.” **Hebrews 11:1 (NLT)**

NEXT WEEK: NORTHSIDE REGIONAL—

Next Sabbath (30 May) Mitchy church will be CLOSED for the Northside regional day. Instead, we encourage everyone to attend a combined program with the northside churches of Brisbane. There will be separate programs for children. The program will be at Northpine Christian College Sports Centre (29 Hughes Rd E, Dakabin 4503), commencing at 10am.

We encourage you to bring your picnic lunch, and we'll meet together after the program to fellowship and eat together.

After Sabbath, there'll be a sports night from 6pm.

CREATION MAGAZINE: Cardiovascular complexity of the giraffe—

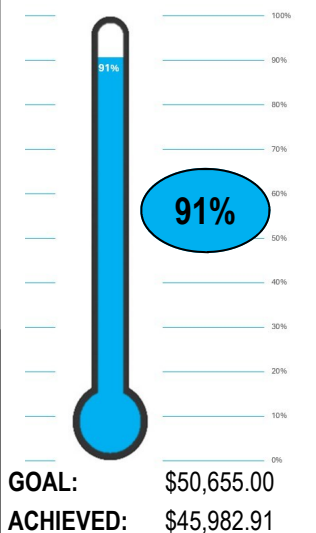

The cardiovascular system of the giraffe has long fascinated scientists and medical researchers alike. As with humans, the giraffe's cardiovascular system was designed with Earth's gravity in mind. The giraffe needs to have sufficiently high blood pressure to overcome the pressure of the very tall column of blood in the neck arteries. Many assume that giraffes must have large hearts to be able to generate high pressure, but their hearts are, surprisingly, not oversized at all. The reason it can produce the high pressure required is design differences in their heart "chambers". Giraffes are also capable of 'buffering' changes in blood pressure, as well as having a complex network of blood vessels in the front of its skull.

How did the giraffe obtain such a specialized cardiovascular system, significantly more complex than previously believed? The overall implication of extraordinary design by a Mastermind is inescapable. Psalm 147:5 declares, "Great is our Lord, and abundant in power; His understanding is infinite."
